

## CITY OF SALINE - OAKWOOD CEMETERY FOUNDATION WORKSHEET

\*\*PLEASE SUBMIT A COPY OF THIS WORKSHEET WITH EACH FOUNDATION ORDER \*\*

Monument Company: \_\_\_\_\_ Telephone number \_\_\_\_\_

Contact person/person submitting foundation request: \_\_\_\_\_

STONE NAME(s): \_\_\_\_\_

TYPE OF MARKER: Single \_\_\_ Double\_\_\_, Family\_\_\_ Government \_\_\_\_, Monument\_\_\_, Slant \_\_\_\_, Bevel \_\_\_\_, Flush \_\_\_\_,  
Other \_\_\_(if other please describe type \_\_\_\_\_)

MARKER SIZE – BASE            Length \_\_\_\_\_ Width \_\_\_\_\_ Height \_\_\_\_\_

DIE/MONUMENT SIZE            Length \_\_\_\_\_ Width \_\_\_\_\_ Height \_\_\_\_\_

### WORKSHEET TO DETERMINE TYPE OF FOUNDATION

Length of base	_____ inches
Height of base	+ _____ inches
Height of stone (Die)	+ _____ inches

= \_\_\_\_\_ total inches  
70 inches or less, a Regular Slab Foundation is required  
71 inches or more, a Pole Foundation is required

REGULAR SLAB FOUNDATIONS - \$0.45 per square inch - Regular slab foundations are used for all stones that have a combined total of length plus height (including base) of 70 inches or less. To determine cost for regular slab foundation, add 4 inches to the base size length and add 4 inches to the base size width. Then, multiply the length by the width to obtain total square inches. Multiply the total square inches by \$0.45 to obtain the price for the regular slab foundation

POLE FOUNDATIONS - \$0.55 per square inch - Pole foundations are used for all stones, which have a combined total of length plus height (including base) of 71 inches or more. To determine cost for pole foundation, add 4 inches to the base size length and add 4 inches to the base size width. Then, multiply the length x the width to obtain total square inches. Multiply the total square inches by \$0.55 to obtain the price for pole foundation.

SPECIAL FOUNDATIONS – Construction cost estimate - A need for a special foundation is determined by the City Superintendent after review of the request for a foundation. A special foundation is used for an exceptionally large or difficult installation, which would require a unique design, or as determined necessary by the City Superintendent.

### WORKSHEET TO DETERMINE COST OF FOUNDATION

Length of base plus 4 inches \_\_\_\_\_ X Width of base plus 4 inches \_\_\_\_\_ = \_\_\_\_\_  
Total square inches

Total square inches \_\_\_\_\_ X \_\_\_\_\_ (\$0.45 *or* \$0.55) = \$ \_\_\_\_\_  
Total cost of foundation
